5.2.1) Test Documentation: Shopping Cart Functionality

Test Scope

This test documentation covers the shopping cart functionality of the Periplus web application. The purpose is to verify that users can search for products, add available products to the cart, view cart contents, update quantities, remove products, and confirm that unavailable products cannot be added.

Test Environment

Field	Details
Application	Periplus Web Store
URL	https://www.periplus.com/
Browser	Google Chrome
User Type	Registered user
Test Data	Valid Periplus test account
Feature Under Test	Shopping Cart

Test Cases

TC_CART_001

Field	Details
Test Case ID	TC_CART_001

Test Case Title	Verify that a registered user can add an available product to the shopping cart
Priority	High
Test Environment	Periplus web application, Chrome browser
Test Description	Verify that a registered user can search for an available product and add it to the shopping cart successfully.
Preconditions	User has a registered Periplus account. User is not logged in. Product search results contain at least one available product.
Test Data	Email: valid registered email. Password: valid password. Search keyword: abc
Test Steps	1. Navigate to https://www.periplus.com/. 2. Click Sign In. 3. Enter valid email and password. 4. Submit the login form. 5. Verify that the user is logged in successfully. 6. Search for abc. 7. Select the first available product that is not marked as Currently Unavailable. 8. Open the product detail page. 9. Click Add to Cart. 10. Open the shopping cart page.
Expected Result	The selected product should be added to the shopping cart. The cart should display the same product ID/ISBN as the selected product.
Actual Result	To be filled after execution.
Status	Pass/Fail
Postconditions	Product exists in the shopping cart.
Notes	This is the main automated test case for the assignment.

TC_CART_002

Field	Details
Test Case ID	TC_CART_002

Test Case Title	Verify that an unavailable product cannot be added to the shopping cart
Priority	High
Test Environment	Periplus web application, Chrome browser
Test Description	Verify that products marked as unavailable are not allowed to be added to the shopping cart.
Preconditions	Product search results contain at least one product marked as Currently Unavailable .
Test Data	Search keyword: test
Test Steps	1. Navigate to the Periplus homepage. 2. Search for a product. 3. Locate a product marked as Currently Unavailable. 4. Attempt to add the product to the cart, if an add-to-cart option is displayed.
Expected Result	The unavailable product should not be added to the cart. The system should either hide the add-to-cart option or prevent the user from adding the product.
Actual Result	To be filled after execution.
Status	Pass/Fail
Postconditions	Shopping cart remains unchanged.
Notes	This is important because users should not be able to purchase unavailable products.

TC_CART_003

Field	Details
Test Case ID	TC_CART_003
Test Case Title	Verify that the shopping cart displays the correct product information
Priority	High
Test Environment	Periplus web application, Chrome browser

Test Description	Verify that the cart displays correct details for the product added by the user.
Preconditions	User is logged in. An available product has been added to the cart.
Test Data	Product ID/ISBN, product title, product price
Test Steps	1. Add an available product to the shopping cart. 2. Open the shopping cart page. 3. Check the displayed product title. 4. Check the displayed product ID/ISBN. 5. Check the displayed product price.
Expected Result	The shopping cart should display the correct product title, product ID/ISBN, and price for the selected product.
Actual Result	To be filled after execution.
Status	Pass/Fail
Postconditions	Product remains in the shopping cart.
Notes	Product ID/ISBN is the strongest verification because it uniquely identifies the product.

TC_CART_004

Field	Details
Test Case ID	TC_CART_004
Test Case Title	Verify that product quantity can be increased in the shopping cart
Priority	High
Test Environment	Periplus web application, Chrome browser
Test Description	Verify that the user can increase the quantity of a product already added to the shopping cart.
Preconditions	User is logged in. A product exists in the shopping cart with quantity 1.
Test Data	Quantity: increase from 1 to 2

Test Steps	1. Open the shopping cart page. 2. Locate the product in the cart. 3. Click the plus button or update the quantity field to 2. 4. Wait for the cart to update.
Expected Result	Product quantity should update from 1 to 2. The subtotal or total price should be updated correctly.
Actual Result	To be filled after execution.
Status	Pass/Fail
Postconditions	Product quantity is updated in the cart.
Notes	This test checks whether cart quantity update works correctly.

TC_CART_005

Field	Details
Test Case ID	TC_CART_005
Test Case Title	Verify that product quantity can be decreased in the shopping cart
Priority	Medium
Test Environment	Periplus web application, Chrome browser
Test Description	Verify that the user can decrease the quantity of a product in the shopping cart.
Preconditions	User is logged in. A product exists in the cart with quantity greater than 1.
Test Data	Quantity: decrease from 2 to 1
Test Steps	1. Open the shopping cart page. 2. Locate the product in the cart. 3. Click the minus button or update the quantity field to 1. 4. Wait for the cart to update.
Expected Result	Product quantity should update correctly. The subtotal or total price should decrease according to the new quantity.
Actual Result	To be filled after execution.

Status	Pass/Fail
Postconditions	Product quantity is updated in the cart.
Notes	Quantity should not become less than the minimum allowed value.

TC_CART_006

Field	Details
Test Case ID	TC_CART_006
Test Case Title	Verify that a product can be removed from the shopping cart
Priority	High
Test Environment	Periplus web application, Chrome browser
Test Description	Verify that the user can remove an existing product from the shopping cart.
Preconditions	User is logged in. At least one product exists in the shopping cart.
Test Data	Existing product in cart
Test Steps	1. Open the shopping cart page. 2. Locate the product in the cart. 3. Click the Remove button. 4. Confirm the product is removed from the cart.
Expected Result	The selected product should no longer be displayed in the shopping cart. If no products remain, the cart should show an empty cart message.
Actual Result	To be filled after execution.
Status	Pass/Fail
Postconditions	Product is removed from the shopping cart.
Notes	This test verifies basic cart item management.

TC_CART_007

Field	Details
-------	---------

Test Case ID	TC_CART_007
Test Case Title	Verify that the cart shows an empty cart message when no products are added
Priority	Medium
Test Environment	Periplus web application, Chrome browser
Test Description	Verify that the system displays the correct message when the shopping cart is empty.
Preconditions	User is logged in. Shopping cart has no products.
Test Data	No product required
Test Steps	1. Login to the application. 2. Open the shopping cart page.
Expected Result	The cart should display a message indicating that the shopping cart is empty.
Actual Result	To be filled after execution.
Status	Pass/Fail
Postconditions	Cart remains empty.
Notes	This confirms that the empty cart state is handled properly.

TC_CART_008

Field	Details
Test Case ID	TC_CART_008
Test Case Title	Verify that cart total is calculated correctly
Priority	High
Test Environment	Periplus web application, Chrome browser
Test Description	Verify that the cart total reflects the correct product price and quantity.

Preconditions	User is logged in. A product is available for purchase.
Test Data	Product price, quantity
Test Steps	1. Add an available product to the shopping cart. 2. Open the shopping cart page. 3. Check the product price. 4. Check the quantity. 5. Check the cart total.
Expected Result	Cart total should equal product price multiplied by quantity.
Actual Result	To be filled after execution.
Status	Pass/Fail
Postconditions	Cart contains the selected product.
Notes	This test is important for verifying pricing accuracy.

TC_CART_009

Field	Details
Test Case ID	TC_CART_009
Test Case Title	Verify that cart contents persist after logout and login
Priority	Medium
Test Environment	Periplus web application, Chrome browser
Test Description	Verify that products added to the cart remain in the cart after the user logs out and logs back in.
Preconditions	User is logged in. Product has been added to the cart.
Test Data	Valid registered email and password
Test Steps	1. Add an available product to the cart. 2. Log out from the account. 3. Log in again using the same account. 4. Open the shopping cart page.

Expected Result	The previously added product should still be displayed in the shopping cart.
Actual Result	To be filled after execution.
Status	Pass/Fail
Postconditions	User is logged in and cart still contains the product.
Notes	This checks whether cart data is saved for registered users.

TC_CART_010

Field	Details
Test Case ID	TC_CART_010
Test Case Title	Verify that checkout button is available when cart contains a product
Priority	High
Test Environment	Periplus web application, Chrome browser
Test Description	Verify that the user can proceed to checkout when the cart contains at least one valid product.
Preconditions	User is logged in. Shopping cart contains at least one available product.
Test Data	Existing product in cart
Test Steps	1. Add an available product to the shopping cart. 2. Open the shopping cart page. 3. Check whether the checkout button is displayed and enabled.
Expected Result	Checkout button should be visible and enabled.
Actual Result	To be filled after execution.
Status	Pass/Fail
Postconditions	User remains on the cart page.
Notes	The test should not complete payment or place an order.

Summary of Test Coverage

Area	Covered By
Add product to cart	TC_CART_001
Prevent unavailable product purchase	TC_CART_002
Product details in cart	TC_CART_003
Increase quantity	TC_CART_004
Decrease quantity	TC_CART_005
Remove product	TC_CART_006
Empty cart behavior	TC_CART_007
Cart total calculation	TC_CART_008
Cart persistence	TC_CART_009
Checkout availability	TC_CART_010
